

# FLEET MANAGEMENT from Skycube

9trax is a time tested GPS based Fleet Tracking Solution with inbuilt Accelerometer, Precision GPS, GSM and GPRS functionalities, with a long battery backup. Dedicated SoS button sends Alerts to the supervisors mapped with the particular device. The one-touch call button lands emergency calls to the immediate supervisors.

## Features

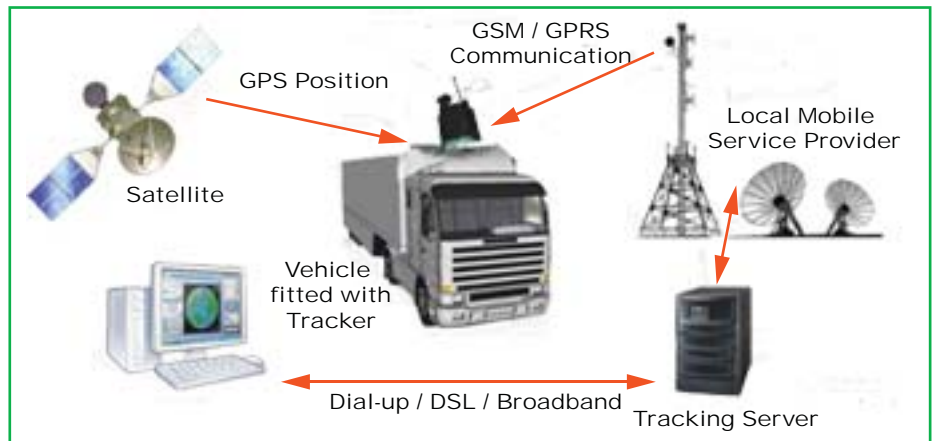

- Real-time visualization of all your vehicles on the map
- Dedicated Single click panic button
- Snoop in facility to connect the call for monitoring
- Dangerous driving alerts
- Long battery life – charge once a week
- Harsh breaking, sudden acceleration alerts
- Ease in creating Routes, stops and geo-fencing
- Route violation alerts, unscheduled stoppage alerts
- Sound alerts for dangerous driving, speeding, harsh breaking
- Easy Magnetic Mount Flexible Attachment
- Integration with NFC tags for identifications at the gates

## Real-time visualization of all your vehicles on the map

Real-time visibility of movement on the map, with direction, speed, battery percentage, alerts if any, exact location on map, both on Web and Mobile

100% visibility of Fleet Movement with time, speed, duration, route, stops taken and other intelligent informations

## Dedicated Single click panic button

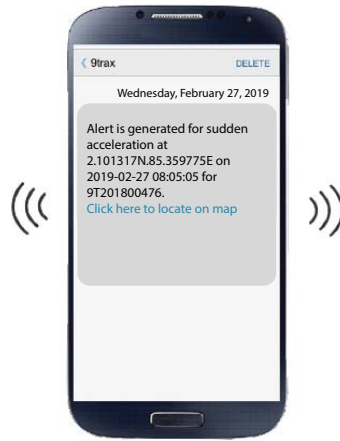

9trax is equipped with a dedicated SoS button. One touch on the SoS button sends an SMS Alert with location to the mobile phones of the supervisors mapped. Up to 5 mobile numbers can be mapped for each 9trax device

Dedicated Call Button – one touch on the Call button lands the call to the immediate supervisor. If the call is not picked up or the phone is engaged, then automatically the call routes to the further superiors.

## Dangerous driving alerts

9trax has an in-built accelerometer, which gets activated immediately when it detects any sudden change of speed. This Alert is immediately sent to the authorities by Mobile Text Messages with location and also to the Mobile App and Web for immediate action.

## Long battery life – charge once a week

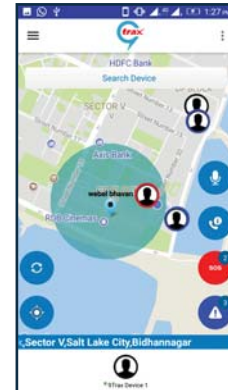

9trax is equipped with long battery life. You need to charge the device only once in a week.

### Battery Features:

- Rechargeable 3.7V, 1200 mAh Battery
- 30hrs (Run time) under typical conditions
- Fully charged in 3 Hours
- Low Battery Indication

## Ease in creating Routes, stops and geo-fencing

Ease in creating Routes, stops and geo-fencing - Intuitive application to easily create routes (routes the vehicle should follow), stops (scheduled stops en route), zones (for zone in and zone out alerts), Point of Interests (eg., Destination). One can create geo-fence easily on the Map interface of the Application itself

## Harsh breaking, sudden acceleration alerts

Harsh breaking, sudden acceleration alerts - Voice alerts to the drivers for harsh breaking, sudden accelerations, over speeding and other rough driving on the device, using the accelerometer, gyroscope and GPS of the 9trax Fleet tracking devices.

## Route violation alerts, unscheduled stoppage alerts

Route violation alerts, unscheduled stoppage alerts - GPS based alert systems for any vehicle that violates the assigned route and take diversions, or take unscheduled stoppages, or stops for longer time.

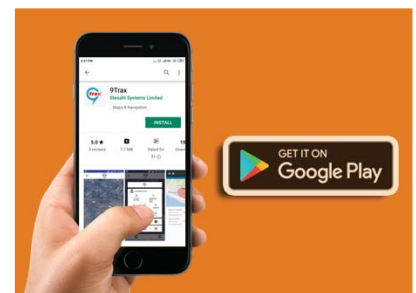

## Sound alerts for dangerous driving, speeding, harsh breaking

Sound alerts for dangerous driving, speeding, harsh breaking - Unique, customized system of voice and sound alerts for any incidents of dangerous driving, generated through the Accelerometer, gyroscope, and GPS of 9trax. This feature reduces the chance for accidents. Also alerts can be customized for the vehicle entering accident-prone zones for increasing the alertness of the driver.

## Easy Magnet Mount

Can be easily detached and then reattached to vehicles, no need to fix and install in vehicles - A vehicle can already have a GPS tracking system, but often this data is only available to the fleet owners. Since you have hired the services of this vehicle, and you are paying for them, it is your right to track the vehicle and plan your logistics accordingly. You can fix the 9trax in a vehicle in under a minute and reclaim back your 9trax from the vehicle as soon as the trip is over and your goods are delivered. You can track your shipments yourself and get intelligent reports, even when you are hiring a fleet of vehicles.

## Integration with NFC tags for identifications at the gates

Integration with NFC tags for identifications at the gates - 9trax comes with an internal NFC, and you can use this feature for your gate entry and exit solutions, integrated to your security system. The vehicle can be identified using the NFC and the security is maintained in your factory premises.
